

## ALBERT SCHWEITZER

---

*Almighty God, whose will it is to be glorified in your saints, and who raised up your servant Albert Schweitzer to be a light in the world: Shine, we pray, in our hearts, that we also in our generation may show forth your praise, who called us out of darkness into your marvelous light; through Jesus Christ our Lord, who lives and reigns with you and the Holy Spirit, one God, now and forever. Amen.*

---

**P**olymath Albert Schweitzer was born January 14, 1875, in Kayersberg, Germany (now France). He was the son of a Lutheran pastor and studied theology at what is now known as the University of Strasbourg. He wrote many important volumes, perhaps none as influential as *The Quest for the Historical Jesus*. He was also an internationally regarded concert organist and musicologist.

In 1905, at age thirty, Schweitzer felt called to take up medicine to help those in need. Eight years later, Schweitzer and his wife, Héléne, founded a hospital in Lambaréné Gabon in French Equatorial Africa. In 1917 they were sent to a French internment camp as prisoners of war. Four months later they were released. The following year, they returned to Europe, where Schweitzer resumed writing books, performing concerts, and preaching in churches. In 1924, Schweitzer returned to Lambaréné, where he lived until his death on September 4, 1965. He used royalties from books, speaking fees, concert revenues, and donations to transform the humble hospital into a massive complex capable of serving more than five hundred patients at a time.

He was awarded the 1952 Nobel Peace Prize for his work in Africa. In his later years, he used his platform to warn against the dangers of nuclear proliferation and to lobby for an end to nuclear testing. He is buried on the hospital grounds with his wife. A cross he made with his own hands marks his grave.
